## **Wednesday, June 13, 2012**

Sutter's comprehensive attack on nursing standards goes to the very heart of a nurse's ability to practice safely as patient advocates. While Sutter executives continue to grant themselves lavish salary and benefit packages, they have simultaneously demanded cuts of up to 30% for nurses and have slashed services to our communities.

CNA is issuing notice for a one-day strike to take place on Wednesday, June 13, on behalf of all members working at striking facilities.

If you're scheduled to work on June 13, you do not need to notify management of your participation on the picket line since the 10-day notice covers this, nor are you obligated to respond to management's questions regarding strike participation.

**Contact your Nurse Negotiators and Labor Reps for picket duty information!**
