FALSE NEGATIVES CAN HAPPEN

IT'S POSSIBLE FOR A PERSON TO HAVE COVID-19 EVEN THOUGH THE TEST IS NEGATIVE

What can affect test results

How a test is handled

How a test is transported

The stage of a person's illness

How a test swab is conducted

What should I do if my test comes back negative?

your healthcare provider should consider the test result with your symptoms & possible exposures in deciding your care plan in case it is a false negative.
